

Information Security Awareness Month 2011

February has been designated as the “Japanese Information Security Awareness Month”. Wide ranging information security campaigns such as promotions and events will take place in order to raise national awareness and gain cooperation

1. Slogan

“Aware, Secure, Continue”

- Be “Aware” of what the risks are and what countermeasures you should take.
- “Secure” your computer from information security threats.
- “Continue” the cycle. Continue to learn, and continue to stick to the measures.

2. Security Top Tips

Promote three top tips of information security for making good use of the Internet safely and securely

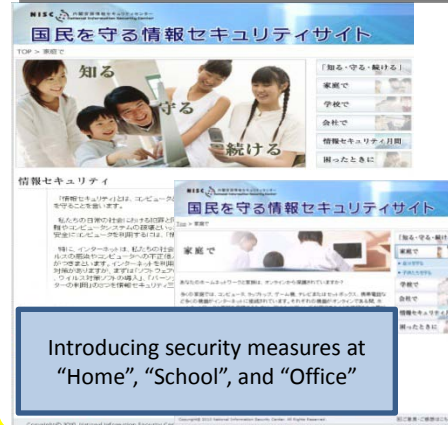

1. Handle important information such as private information with care
2. Do not access suspicious sites or e-mails
3. Keep security tools up-to-date

3. Portal website

Links to information security sites in the NISC website

<http://www.nisc.go.jp/security-site/>

Introducing security measures at “Home”, “School”, and “Office”

4. Visual promotions

Publicize the “Information Security Awareness Month” using stickers, Internet banners, posters, and screen savers

5. Public and private partnership

- Display Internet banners of “Information security site for protecting the nation”
- Awareness raising through social networks and existing e-mail newsletters

6. Measures for government agencies

- Thoroughly permeate information security measures among government agencies
- Document information security measures and distribute among government staff

7. Kick-off symposium

Kick-off symposium for the “Information Security Awareness Month” on awareness raising
